๑. Concept Note
 ๒. Provisional Programme
 ๓. แบบตอบรับ
 ๔. ใบประชาสัมพันธ์

ด้วยสัตวแพทยสภา ร่วมกับ องค์การโรคระบาดสัตว์ระหว่างประเทศ (The World Organisation for Animal Health - OIE) จัดสัมมนา ในหัวข้อ 2nd OIE Information Seminar for Practicing Veterinarians: Combating AMR ในวันที่ ๑๘ ตุลาคม ๒๕๖๐ ตั้งแต่เวลา ๘.๑๕ - ๑๗.๐๐ น. ณ โรงแรม Pullman Bangkok King Power กรุงเทพฯ รายละเอียดตามสิ่งที่ส่งมาพร้อมนี้

สัตวแพทยสภา จึงใคร่ขอเรียนเชิญท่านให้เกียรติเข้าร่วมการสัมมนา 2nd OIE Information Seminar for Practicing Veterinarians: Combating AMR ในวันที่ ๑๘ ตุลาคม ๒๕๖๐ ตั้งแต่เวลา ๘.๑๕ - ๑๗.๐๐ น. ณ โรงแรม Pullman Bangkok King Power กรุงเทพฯ โดยไม่เสียค่าใช้จ่าย ในการลงทะเบียน สามารถลงทะเบียนและส่งแบบตอบรับได้ที่ E-mail: vetforeign@vetcouncil.or.th ภายในวันที่ ๑๖ ตุลาคม ๒๕๖๐ สอบถามข้อมูลเพิ่มเติมได้ที่ สัตวแพทย์หญิง ดร. เพ็ญญา มัชฌิมพงศ์ E-mail: p.matayompong@oie.int และขอความอนุเคราะห์ช่วยกรุณาประชาสัมพันธ์งานฯ ดังกล่าว ในหน่วยงานของท่าน จักเป็นพระคุณยิ่ง

จึงเรียนมาเพื่อโปรดพิจารณา และขอขอบคุณล่วงหน้ามา ณ โอกาสนี้

ขอแสดงความนับถือ

(ผศ.นายสัตวแพทย์ ดร.ธีระศักดิ์ พราพงษ์)

เลขาธิการสัตวแพทยสภา

Concept Note

2nd OIE Information Seminar for Practicing Veterinarians: Combating AMR

1. Background

Antimicrobial agents are a global public good. However, the overuse and misuse of antimicrobial products has dramatically contributed to the emergence and spread of antimicrobial resistant organisms, which pose an extraordinary threat to human and animal health, and to the world ecosystem. In recent decades, the world has been confronted with the accelerated emergence of antimicrobial resistance (AMR) due to the massive use of antimicrobial agents in human and animal health. The discovery of new treatments is not keeping up with bacteria, the microorganisms responsible for sometimes serious diseases in humans and animals. It is therefore vital to ensure adequate access to effective antimicrobial agents to treat animal diseases, protect human health, and guarantee food safety. The globalisation of trade in food products, as well as both conventional and medical tourism enable resistant bacteria to colonise the entire globe. In spite of preventive measures applied locally, the risky behaviour of one country can endanger the efficacy and availability of antibiotics worldwide. Sixty percent of pathogens dangerous to man are of animal origin: humans and animals share the same bacteria, which need to be combated and prevented at the national, regional and global levels. Curbing the AMR emergence therefore requires the One Health approach.

In terms of animal health, the responsible and prudent use of antimicrobial agents is essential for maintaining their therapeutic efficacy. The World Organisation for Animal Health (OIE) as the reference organisation for standards related to animal health and zoonoses has published intergovernmental standards on the responsible and prudent use of antimicrobial agents in terrestrial and aquatic animals. These texts cover the use of antimicrobial agents, as well as surveillance programmes, monitoring of quantities, and the assessment of the risks of the emergence or spread of resistant bacteria as a result of their use in animals. The OIE also publishes intergovernmental standards related to the List of Antimicrobials of Veterinary Importance.

In fighting against AMR, veterinarians are part of the solution by ensuring the responsible and prudent use of antimicrobial agents in animals, in accordance with the OIE intergovernmental standards. They must be well trained and well supervised by the veterinary statutory bodies created by law.

In 2015, the OIE by the OIE Sub-Regional Representation for South-East Asia (OIE SRR SEA) organised the OIE Information Seminar for Practicing Veterinarians in Indonesia, Malaysia, Myanmar, Philippines and Thailand where there are high potential in animal production. The seminars enhanced participants' knowledge and application of OIE standards, guidelines and recommendations as well as promoting engagement of private practitioners in pursuing public good opportunities in their national Veterinary Services. Each seminar included group discussion on developing partnerships between public and private veterinarians in AMR prevention and control. A number of recommendations were proposed. Those included organizing seminar/workshops for stakeholders to become more informed on the prudent use of antimicrobials, banning of antibiotic growth promoters, increased transparency on how monitoring of antibiotic usage and AMR is currently being managed, clear communication to private practitioners on the strategy/guidelines for AMR prevention/control, greater collaboration/involvement of private laboratories in monitoring

AMR as well as sharing their results/research with the Veterinary Services, developing a national AMR surveillance systems, developing database system on AMR monitoring, etc. In this regard, to monitor and evaluate the progress of those countries have made on the activities related to the outputs of the 2015 Seminars, the OIE SRR SEA is going to organise the 2nd seminars for practicing veterinarians focusing on combating AMR.

2. Objectives

- 2.1 To enhance participants' knowledge and application of OIE standards and recommendations for controlling AMR
- 2.2 To improve participants' knowledge and understanding on data collection on the use of antimicrobial agents in animals
- 2.3 To encourage awareness and engagement of participants in implementation of a country National Action Plan on AMR
- 2.4 To promote collaboration between public sector and private sector veterinarians in combating AMR

3. Participants

A total of 200 participants comprising private sector veterinarians, public sector veterinarians, lecturers from veterinary education establishments and other interested stakeholders.

4. Content of the seminars

As attached programme

5. Location

Malaysia, Myanmar, Philippines, Thailand

6. Duration

One day seminar

7. Facilitators

Dr Pennapa Matayompong

8. Budget

USD 10,000 per seminar

9. Evaluation

Post-seminar evaluation questionnaire

10. Expected outcomes

- Participants can efficiently apply the OIE standards and recommendations for AMR prevention and control in their practices and can distribute their knowledge to stakeholders.
- Participants are able to record and collect data on the use of antimicrobial agents in animals.
- National Action Plan on AMR is effectively and efficiently implemented.
- Good cooperation and collaboration of participants in combating AMR

2nd OIE Information Seminar for Practicing Veterinarians: Combating AMR

Hotel Pullman Bangkok King Power, Bangkok, Thailand

18 October 2017

Provisional Programme

Time	Topics
08:15 – 09:00	Registration
09:00 - 09:30	Opening ceremony
09:30 – 09:45	OIE in Brief <i>OIE</i>
9:45 – 10:45	OIE Recommendations for Controlling Antimicrobial Resistance (AMR) <ul style="list-style-type: none"> - AMR surveillance and monitoring programme - Monitoring quantities and usage patterns of antimicrobial agents - Responsible and prudent use of antimicrobial agents - Risk analysis for AMR arising from the use of antimicrobial agents - Laboratory methods for bacterial antimicrobial susceptibility testing <i>OIE</i>
10:45 – 11:05	Coffee Break
11:05 – 12:05	OIE Annual Report on the Use of Antimicrobial Agents in Animals <i>OIE</i>
12:05 – 12:15	Discussion
12:15 – 13:30	Lunch
13:30 – 13:50	Thailand National Action Plan on AMR <i>Department of Livestock Development (DLD), Thailand</i>
13:50 – 14:10	Importation & Distribution Control and Consumption Surveillance of Antimicrobial Agents in Thailand <i>Food and Drug Administration (FDA), Thailand</i>
14:10 – 14:30	Use of Antimicrobial Agents in Veterinary Medicine in Thailand <i>Animal Health Products Association (AHPA), Thailand</i>
14:30 – 14:40	Discussion
14:40 – 15:00	Coffee Break
15:00 – 16:30	Panel Discussion: How to collaborate in combating AMR in animal sector of Thailand <i>Moderator: Veterinary Council of Thailand</i> <i>Panelists: DLD, AHPA, Thai Swine Veterinary Association, Thai Poultry Veterinary Association, The Veterinary Practitioner Association of Thailand, Thai Feed Mill Association</i>
16:30 – 17:00	Conclusions and Closing Ceremony

Reply Form

This form should be returned to 2nd OIE Information Seminar for Practicing Veterinarians: Combating AMR secretariat by Monday, 16th October 2017.
